

## [ DESCRIPTION ]

## RUN ON TIMER MECHANISM

Connected Switchgear's run on timer device is designed for applications where a 240V AC input load device is required to operate for a period of time after the circuit has been switched off. The most suitable application may be washrooms where a switch operating both a luminaire and exhaust fan together is required to turn the light off whilst allowing the fan to continue to operate for a specific time before switching off.

## [ FEATURES ]

- 5 sec - 1 Hour Adjustment
- Small and compact

## [ COMPATIBILITY ]

- All load types

## [ TECHNICAL PARAMETERS ]

- Connection Type: 4 Wire
- Supply Voltage: 240V AC
- Frequency: 50Hz
- Max Power Rating: 2400W
- Min Load: 1W
- Operating Temp: 0 to 50°C
- Complies with:  
AS/NZS 60669.2

## [ APPROVALS ]

- Global Mark Approved
