

D-shaped and linear - The single-piece design, complementary accessories and subtle shapes combine so that D-Line cable trunking is 'quick to install and looks great! Compared to channelling walls or lifting floors to contain cables, D-Line appreciate how surface trunking installations can save huge amounts of time and cost, while minimising inconvenience and protecting cables for on-going peace of mind.

At D-Line we respect that for I.T. and Datacom's, electrical upgrades, Fire & Security, and many HVAC and Audio Visual projects, the equipment will often be the most costly expenditure but for a surface installation, the trunking will usually be the most conspicuous element! D-Line decorative trunking Can be painted to match decor. Easy to cut. Self-extinguishing and safety tested to exacting standards. UV stabilised, so won't fade or change colour in the sun. D-Line enables a quality of finish to complement the interior design of modern spaces, in stylish ways.

D-Line Cable Tidy Units provide the most popular solution to contain extension sockets and cable spaghetti. The smart tech design blends with modern surroundings. 3x rear cable entry/exit slots enable cables to be routed to left-side, right-side or vertical.

Fully safety tested, and produced from electrically-safe robust ABS material with an effective click-lock lid, these Socket Enclosures sort unsightly cables and contribute to a positive Health & Safety culture.

Use large unit to contain popular 6-gang extension sockets up to 340mm length.

Use small unit to contain popular 4-gang extension sockets up to 280mm length.

Tidy Tube

1.1m length is perfect for covering common cable drops, from desks or TVs for example... lengths can be scissor cut if shorter lengths are required. The pre-split tube & highly flexible LDPE material enables easy installation. This split Cable Tube can simply retro-fit over cables without the need to make any disconnections.

Cable Tidy Wrap

Can expand to contain bundles of cables between 10mm to 40mm diameter; users simply wrap the Spiral around cables to give effective protection.

This versatile solution allows cables to enter or exit along the length, ideal when multiple cable entry/exits are required.
