# 1. Hub and Accessories

The Hills Home Hub range of enclosures delivers a complete solution to suit the most demanding applications. Flexibility of mounting installation types and sizes ensure there is a Hills Home Hub enclosure solution tailored to meet your specific customer requirements. A modular design approach has been chosen for the 400, 600 & 1000 series enclosures, enabling compact placement of distribution modules and power supplies.

400 Series Surface Mounted Enclosure

600 Series Universal Mounted Enclosure

1000 Series Universal Mounted Enclosure

# Hills Home Hub 400 Series Surface Mount Enclosure

## Features

- Surface mounted
- Provides the convenience of left or right-opening door
- Has a flexible equipment fixing design
- Supplied with a Hills Security System mounting bracket
- Ideal for apartments and smaller applications

## Specifications

Dimensions: 480mmH x 370mmW x 110mmD

Material: Steel

Colour: Hills White (powder coated)

Lockable Cover: Yes

Tamper Protection: Yes (on security system bracket). Tamper switch sold separately.

Surface Mounted: Yes

Approximate Module Capacity: 6

## Ordering Information

S3489 Kit with Power Supply

HHH-4ACC Hub 400 Accessory Pack  
HPS-25W Hills Security and Ancillary Power Supply

400 Series Surface Mounted Enclosure

# Mounting the Hills Home Hub 400 Series Surface Mount Enclosure

1. Place the enclosure against the wall in the position where you want to install it. Make allowance for cable entry points.
2. Mark pilot holes.
3. Remove the enclosure and drill pilot holes.
4. Put the enclosure in place, and fix it to the wall using appropriate screws for the material you are drilling and the weight of the finished system (15-20kgs).
5. Ground the enclosure. An M3 earth-bonding screw is located in the accessory pack and should be affixed to the hub enclosure base. Place an earth symbol sticker (included in the accessory pack) on the enclosure base adjacent to the earth-bonding screw. Attach a ground wire between this and an earth ground point.

## Option: Mounting the Hills Security PCB

If utilising the security option within the enclosure:

1. Locate the 4 x PCB standoffs found in the accessory pack.
2. Attach these to the security bracket (pre-fitted inside the enclosure).
3. Align the Hills Security PCB with the standoffs and clip into place as shown.
4. Install a tamper switch as shown.

## Option: Mounting locations for GPO's

6 mounting locations are provided for installation of GPO's as shown.

# Hills Home Hub 400 Series Flush Mount Enclosure

## Features

- ▶ Can be concealed into most wall types including double brick and dry walls with a minimum of 90mm depth
- ▶ Provides the convenience of left or right-opening door
- ▶ Has a flexible equipment fixing design
- ▶ Supplied with a Hills Security System mounting bracket
- ▶ Ideal for apartments and smaller applications

## Specifications

**Dimensions:** Back box: 480mmH x 365mmW x 88mmD

**Surround frame:** 540mmH x 415mmW

**Material:** Steel

**Colour:** Hills White (powder coated)

**Lockable Cover:** Yes

**Tamper Protection:** Yes (on security system bracket). Tamper Switch sold separately.

**Cavity Mounted:** Yes

**Approximate Module Capacity:** 6

400 Series Flush Mounted Enclosure

## Mounting the Hills Home Hub 400 Series Flush Mount Enclosure

The Hills Home Hub – 400 Series Flush may be mounted in 90mm deep or greater plasterboard, brick or rendered wall.

1. Remove the front cover of the enclosure by unscrewing the four corner screws.
2. Place the enclosure against the wall in the position where you want to install it. Make allowance for cable entry points.
3. Make a mark on the wall studs through the centre of the elongated mounting holes.
4. Remove the enclosure and drill pilot holes.
5. Put the enclosure in place, and fix it to the wall using appropriate screws for the material you are drilling and the weight of the finished system (15-20kgs).
6. Ground the enclosure. An M3 earth-bonding screw is located in the accessory pack and should be affixed to the hub enclosure base. Place an earth symbol sticker (included in the accessory pack) on the enclosure base adjacent to the earth-bonding screw. Attach a grounding wire between this and an earth ground point.
7. Mount the front cover using the four corner screws.

### Option: Mounting the Hills Security PCB

If utilising the security option within the enclosure:

1. Locate the 4 x PCB standoffs found in the accessory pack.
2. Attach these to the security bracket (pre-fitted inside the enclosure).
3. Align the Hills Security PCB with the standoffs and clip into place as shown.
4. Install a tamper switch as shown.

### Option: Mounting locations for GPO's

6 mounting locations are provided for installation of GPO's as shown.

# Hills Home Hub 600 Series Universal Mount Enclosure

## Features

- Universal mounting (surface or flush mount)
- Can be concealed into most wall types including double brick walls and 70mm or 90mm depth dry wall
- Provides the convenience of left or right-opening door with the added benefit of simple door removal when servicing is required.
- Has a unique security system compartment designed to shield and protect (using a tamper system) the Hills Home Hub Security modules so that only authorised users can access them.
- Has a flexible equipment fixing design
- Low mounting bracket for fixing Hills Home Hub modules that require the maximum depth of the hub.
- High mounting bracket provides additional cable management facilities underneath the mounted Hills Home Hub modules, therefore doubling the available cabling space

## Specifications

Dimensions: Back box: 600mmH x 405mmW x 110mmD  
Surround frame: 701mmH x 506mmW  
Material: Steel  
Colour: Hills White (powder coated)  
Lockable Cover: Yes  
Tamper Protection: Yes. Tamper Switch Sold Separately  
Cavity Mounted: Yes  
Surface Mounted: Yes  
Approximate Module Capacity: 8

600 Series Flush Mounted enclosure

600 Series surface mount enclosure

# Surface Mounting the Hills Home Hub 600 Series Enclosure

The Hills Home Hub may be surface mounted.

**Surface Hub Dimensions:** 600mmH x 405mmW x 110mmD

1. An M6 grounding post is provided with the accessory pack. Install the grounding post through the grounding post hole located in the middle of the enclosure. Place an earth symbol sticker (found in the accessory pack) on the enclosure base adjacent to the earth-bonding post.
2. Place the enclosure against the wall in the position where you want to install it. (Note that the enclosure may be heavy and care must be taken to minimise the risk of injury. Please seek assistance if required). Make allowance for cable entry positions.
3. Mark pilot holes.
4. Remove the enclosure and drill pilot holes.
5. Put the enclosure in place, and fix it to the wall using appropriate screws for the material you are drilling and the weight of the finished system.(15-20kgs)
6. Ground the enclosure.
7. Install chosen Hills Home Hub modules and terminate cables.
8. Affix the enclosure lid using the hinge slots provided (for left or right hand opening).

## Option: Mounting the Hills Security PCB

If utilising the security option within the enclosure:

1. Remove the security cover by releasing the 2 plastic snap rivets (the enclosure lid must be removed first).
2. Locate the security mounting bracket and the 4 x plastic snap rivets found in the accessory pack.
3. Mount the security PCB onto the security mounting bracket using the 4 PCB standoffs found in the accessory pack.
4. Align the security mounting bracket with the holes on the low module mounting bracket within the security compartment and secure using the 4 plastic snap rivets.
5. Connect all ancillary devices to the security PCB (battery, sensors, code pads etc.).
6. Select a location for the tamper switch. There are 4 possible locations (2 on the security cover and 2 on the hub enclosure base). The 2 tamper switch locations on the security cover are for protection against security cover removal and/or removal of the hub enclosure from the wall (box tamper). The 2 tamper locations on the hub enclosure base are for protection against unauthorised opening of the enclosure lid (depending on left or right hand opening).
7. Install a tamper switch/es in the desired locations.
8. Replace the security cover.

## Option: Mounting locations for GPO's

6 mounting locations are provided for GPO's as shown.

Locations marked "A" are for the placement of the hub enclosure base over an existing GPO. Locations marked "B" are for the installation of a new GPO into the hub enclosure base.

# Flush Mounting the Hills Home Hub 600 Series Enclosure

The Hills Home Hub may be optionally flush mounted in a 70mm or 90mm plasterboard, brick or rendered wall.

## Flush Hub Dimensions:

Back Box: 600mmH x 405mmW x 110mmD

Surround: 701mmH x 506mmW

1. An M6 grounding post is provided with the accessory pack. Install the grounding post through the grounding post hole located in the middle of the enclosure. Refer to diagram 3 for location. Place an earth symbol sticker (found in the accessory pack) on the enclosure base adjacent to the earth-bonding post.
2. Place the enclosure against the stud at the desired height. See diagram 2. (Note that the enclosure may be heavy and care must be taken to minimise the risk of injury. Please seek assistance if required) The enclosure must be mounted so that it is extruding 35mm - measured from the front face of the plasterboard to the front face edge of the enclosure. Refer to diagram 4. Make allowance for cable entry positions.
3. Make a mark on the wall studs through the centre of the flush mounting holes. Refer to diagram 3 for location.
4. Remove the enclosure and drill pilot holes.
5. Mount the enclosure in place, and fix it to the wall using appropriate screws for the material you are drilling and the weight of the finished system (15-20kgs). Wood screws are supplied in the accessory pack.
6. Remove the security cover by releasing the 2 plastic snap rivets
7. Attach the enclosure frame using the provided screws found in the accessory pack.
8. Ground the enclosure.
9. Install chosen Hills Home Hub modules and terminate cables.
10. Replace the security cover.
11. Affix the enclosure lid using the hinge slots provided (for left or right hand opening).

# Hills Home Hub 1000 Series Universal Mount Enclosure

## Features

- ↘ Universal mounting (flush or surface)
- ↘ Can be concealed in most wall types including double brick walls with 90mm depth or greater
- ↘ Removable door for installation convenience
- ↘ Has flexible equipment fixing design

## Specifications

Dimensions: Back Box: 1066mmH x 362mmW x 100mm D

Cover: 1105mmH x 400mmW

Material: Steel

Colour: Hills White (powder coated)

Cavity Mounted: Yes

Surface Mounted: Yes

Approximate Modules: 16

## Ordering Information

S3494 Kit with Power Supply  
HHH-1000E 1000 Series Universal Mount Enclosure  
HPS-25W Hills Security and Ancillary Power Supply

1000 Series Universal  
Mounted Enclosure

# Mounting the 1000 Series Hills Home Hub Enclosure

1. Using the mounting tabs or side slots to mount the enclosure between the studs, or using mounting holes provided in the back of the unit for surface mounting. NB. Be sure to leave enough space both on the top and bottom of the unit for wire routing and the "UP" arrow should face to the top. (Fig 1 )
2. When using the side slots, position the enclosure with the front to protrude beyond the wallboard surface, which will match the finished wall. Mark the center of the mounting slots, this allows for further adjustment to match the finished wall. Drill pilot holes and install the enclosure with wood screws. When using the mounting tabs, select the proper holes (A-5/8", B-1/2" or C-3/8") for wallboard. When using the mounting holes, attach the unit to the wall with screw anchors recommended to support the weight of the enclosure and variety of modules. (Fig 2)

## Cable Installation

Remove the knockouts which can be found on the top, bottom, sides and back of the enclosure as needed for wiring. Insert a screwdriver into the slot and bend to break the knockout. Insert the plastic grommets in the opening to protect cables from being damaged. (Fig 3)

## Grounding the Enclosure

The grounding screw is located inside the bottom of the enclosure. A grounding wire is needed and should be connected securely between the grounding screw and an earth ground point. (Fig 4)

## Installing the Cover

Hook the cover on the enclosure then screw it via mounting holes on the cover. (Fig 5)

## Cable Management

Using the cable ties provided, group and attach the wires at the side grids of the enclosure.(Fig 6)

Fig 1

Fig 2

Fig 3

Fig 4

Fig 5

Fig 6

## 2. Security Modules

The NX-Series offers a range of security panels, from 4 zones up to 16, and expandable up to 48 zones. The NX-Series can use a combination of door and window sensors, smoke sensors, glassbreak sensors, and interior motion sensors to detect unauthorized entry. The code pad gives full control over the system and allows viewing of all devices with ease. With the NetworX NX-Series' built-in digital communicator, alarms can be immediately reported to an Alarm Monitoring Station, which is staffed 24 hours a day, ready to report a burglary, fire, or panic condition to the homeowner or the proper authorities. The NX16 supports keyless entry & door access control modules.

# NetworX NX-4

## Features

- 4 fully programmable zones
- Hardwire/wireless hybrid
- All zones programmable as fire or burglary
- 31 customisable pre-configured zone types
- 8 user codes
- Up to 8 keypads
- 1 duress code
- Up/downloadable with competitor lockout
- Siren supervision
- Automatic arming with auto retry
- Fire alarm verification
- Dynamic battery test
- Contact ID format
- Event activated pager format
- Flexible auto-test reports
- Failure to communicate reporting
- Reports entering/exiting program mode
- Will communicate alarm events during programming 185 Event Log
- Includes date, time & event
- ITI wireless technology
- Up to 8 supervised wireless zones
- Keypad annunciation of alarm, tamper, low battery, and lost transmitter

## Specifications

Operational power: 16.5VAC 40VA  
Auxiliary power: 1 Amp max  
Loop Resistance For standard loop: 300 Ohms maximum  
Built-in siren driver: 2 tone (temporal & yelp)  
Alarm Current Available: 2.5 Amp (if above driver is not used)  
Loop response: 500ms  
Operating temperature: (0° to 49°)C  
Recommended Battery: Rechargeable 12V 4Ah  
Enclosure dimensions: 23cm W x 20cm H x 9cm D  
Enclosure color: Belgian Grey  
Shipping weight: 3.5kg

## Ordering Information

S4133 NX-16 16 Zone Control Panel Only

### 3. Data and Phone Modules

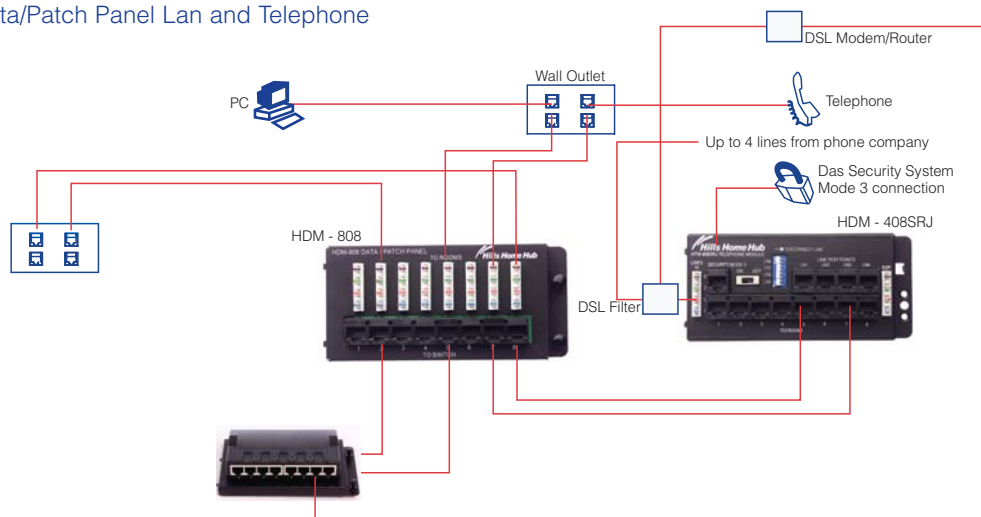

The Hills Telephone Module series replaces two-pair telephone wire with current commercial-grade Category 5e cable, designed to meet the demands of telecom distribution of voice, fax, modem and other digital telephone services such as ISDN or DSL. Each HTM module supports up to 4 phone lines. Output connections are via RJ-45 plug or punch down twisted pair.

Companies have long enjoyed the benefits of sharing resources and improving communications by networking computers and peripherals together. The Hills Data Module puts this technology into the home. Families can now share an ultra-high speed internet connection such as cable modem, DSL or ISDN. The HDM patch panel connects to the Ethernet hub to activate the network.

#### Data/Patch Panel Phone System Unifone

#### Data/Patch Panel Lan and Telephone

## 8 Port Patch Panel

### Features

- ▶ Provides a network interface for LAN and telephone applications
- ▶ Supports Cat 5E
- ▶ 8 patch connection points

### Specifications

Dimensions: 75mmH x 159mmW x 22mmD  
Colour: Hills Black  
Performance tested to Cat 5e specifications: Yes

### Ordering Information

S2119 HDM-808 8 Port Computer Patch Panel

## Ethernet Switch

### Features

- ▶ 8 port 10/100 Ethernet switch
- ▶ Designed to provide network services for a small Local Area Network
- ▶ Compatible for connecting computer networks and Ethernet-based broadband internet services
- ▶ Power Supply included

### Specifications

Dimensions: 102mmH x 159mmW x 30mmD  
Colour: Hills Black  
Auto-sensing: Yes  
Standards Compliance: 10/100 Base T, IEEE 802.3, IEEE 802.3u  
Operating Voltage: 12V DC

### Ordering Information

S2240 HES-108 8 Port Ethernet Switch

# Installing the 8 Port Patch Panel & Ethernet Switch

To install the module, simply insert tabs to the cap located on the rail of the enclosure. Press the fastener to lock the module at the desired position. (see Fig. 1)

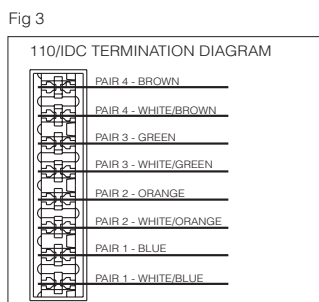

## Operation

Terminate the cables on the 4-pair 110/IDC connectors of this data/patch distribution module. Each Category 5e cable should be fully terminated on the contact blades. This module supports the TIA T568A wiring standard and is capable of connecting eight Category 5e cables. Identify which port you wish to activate and connect one end of a patch cord to the corresponding jack and

the other end to the HES-108 Ethernet Hub. (see Fig. 2)

## Wire installation

For the 110/IDC connector, follow the wire colour-code and only use the 110 punch-down tool to push the wire between the contact blades (see Fig. 3). For the RJ45 plug, follow the TIA T568A standard for wiring instructions (see Fig. 4). Patch Panel Module RJ-45 Jacks phone and data lines are wired according to the TIA T568A standard.

## Patching Telephone Module

### Features

- 4 telephone lines IN, 8 telephone locations OUT
- Built-in Security System Mode 3 connection
- Individual incoming line disconnection and test points
- 4 line expansion port
- Designed for telephone line patching
- 100 / Krone Compatible IDC Connectors for line input and expansion port output

### Specifications

Dimensions: 75mmH x 159mmW x 22mmD  
Colour: Hills Black  
Performance tested to Cat 5 specifications: Yes

### Ordering Information

S2463 HTM-408SRJ Patching Telephone Module

## Punch Down Telephone Module

### Features

- 4 telephone lines IN, 8 telephone locations OUT
- Built-in Security System Mode 3 connection
- Individual incoming line disconnection and test points
- 4 line expansion port
- Designed for telephone line punching
- 100 / Krone Compatible IDC Connectors for line input and expansion port output

### Specifications

Dimensions: 75mmH x 159mmW x 22mmD  
Colour: Hills Black  
Performance tested to Cat 5 specifications : Yes

### Ordering Information

S2120 HTM-408S Punch Down Telephone Module

# Installing the Patching Telephone Module

To install the module, simply insert tabs to the cap located on the rail of the enclosure. Press the fastener to lock the module at the desired position. (see Fig. 1)

## Operation

The Hills Home Hub® Telephone Module has a RJ45 socket labelled "LINES IN" to support four incoming phone lines from the telephone company and distribute them up to eight rooms. Patch the twisted pairs to each line that is required at each room. Blue & Orange/White Orange) to the first 110/IDC connector to support a 2-line phone. Follow the same procedure for each subsequent Room.  
Note - Connect only one twisted pair of Cat5/Cat5e cable to each 110/IDC connector. (see Fig. 2)

## Telephone Expansion

The RJ45 jack labelled "EXPANSION" is used to link another telephone distribution modules to support additional rooms.(see Fig 2)

## Wire installation

For RJ-45 plug termination, follow the TIA -T568A standard for wiring instruction . (see Fig 2)

Fig 1

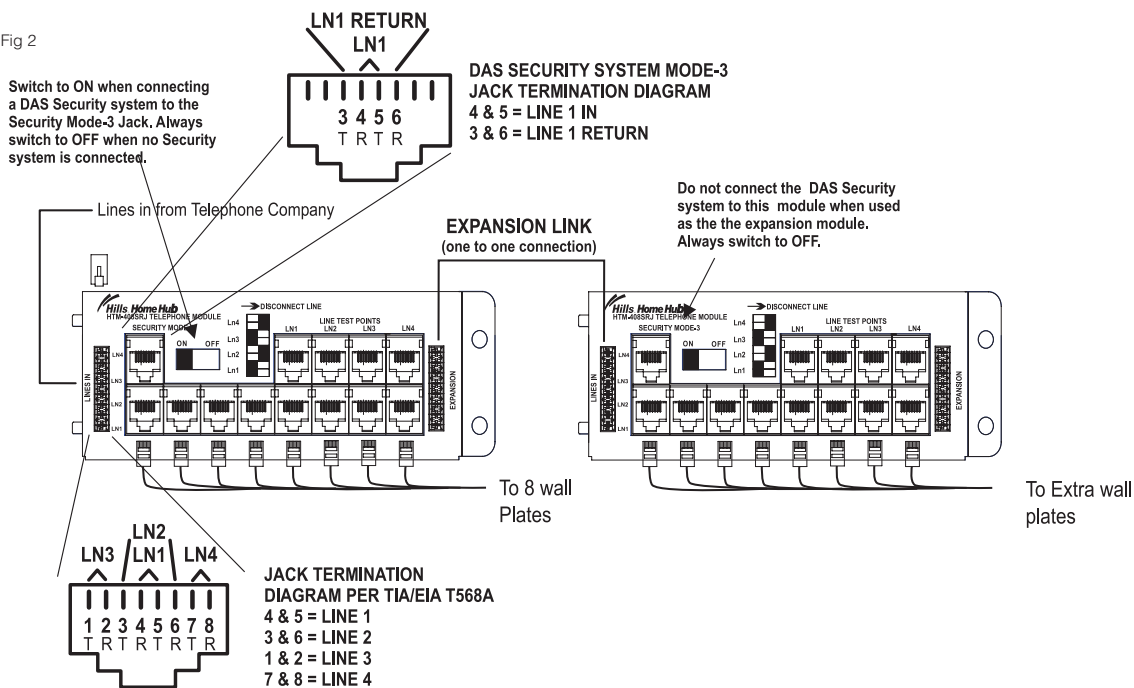

Fig 2

# Installing the Punch Down Telephone Module

To install the module, simply insert tabs to the cap located on the rail of the enclosure. Press the fastener to lock the module at the desired position. (see Fig. 1)

## Operation

The Hills Home Hub® Telephone Module has a 110/IDC punch-down connector labelled "LINES IN" to support four incoming phone lines from the telephone company and distribute them up to eight rooms. Punch down the twisted pairs to each line that is required at each room.

**Example:** Each 110/IDC connector represents one Room, if you want to activate line #1 at Room #1, simply punch down the twisted pair (Blue/White Blue) to the first IDC/110 connector. If you want to use a 2-line phone (Line#1 & Line#2) at Room #1, simply punch down twisted pairs (Blue/White Blue & Orange/White Orange) to the first 110/IDC

connector to support a 2-line phone. Follow the same procedure for each subsequent Room.

**Note -** Connect only one twisted pair of Cat5/Cat5e cable to each 110/IDC connector. (see Fig. 2)

## Telephone Expansion

There is a 110/IDC connector labelled "EXPANSION" which is used to link another telephone distribution modules to support additional rooms. (see Fig 2)

## Wire installation

For 110/IDC connector termination follow the wire colour-code and only use the 110 punch-down tool to push the wire between the contact blades. For RJ-45 plug termination, follow the TIA T568A standard for wiring instruction. (see Fig 2)

Fig 1

Fig 2

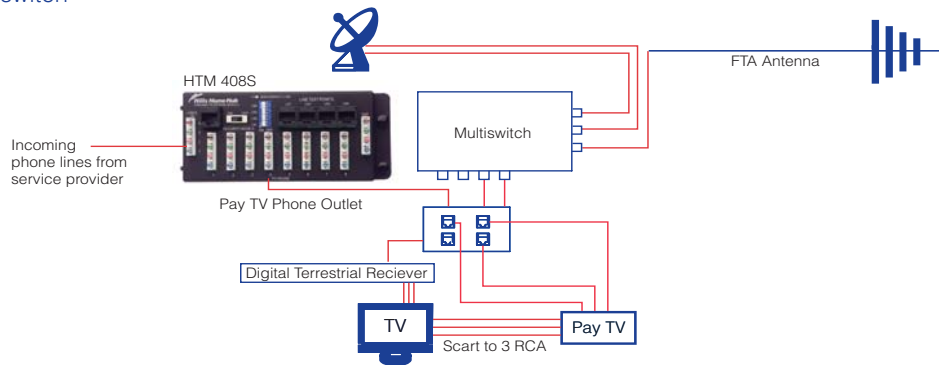

## 4. Video Modules

The video distribution modules cater for a broad range of services including CATV, FTA Antenna TV, Satellite and Pay TV services. Modulators allow multi-room broadcast of your DVD, VCR, Pay TV and cameras from a single location to your entire distribution network, which can be controlled from any remote location.

## 4 Location Passive Splitter

### Features

- ▶ Passive video splitter module used to route Free-to-Air, CATV, modulator and satellite signals to multiple locations
- ▶ Vertical mounting
- ▶ Suitable for 600 series, 1000 series hub and 400 series surface mount hub only
- ▶ Digital TV compatible

### Specifications

Dimensions: 102mmH x 159mmW x 100mmD  
Colour: Hills Black  
Input Frequency Range: 5MHz - 2300MHz

### Ordering Information

S2126 HVS-104PV Passive Splitter - 1 IN 4 OUT

## 6 Location Active Video Splitter

### Features

- ▶ 2 F-type connector inputs (one with DC power-pass) & 6 F-type connector active outputs
- ▶ Inputs are capable of accepting signals from Free-to-Air, CATV modulators and security cameras
- ▶ Digital TV compatible

### Specifications

Dimensions: 72.5mmH x 165mmW x 25mmD  
Frequency Range: 40MHz - 1000MHz  
Max. Input Level: 83dBuV  
RF Output level: 100dBuV  
Output Gain:  $\geq 7$ dB  
RF Return Loss:  $\geq 10$ dB  
Power: 12V DC @ 500mA

### Ordering Information

S2707 HAS-206 Active Video Splitter - 2 IN 6 OUT

# Installing the 4 Location Passive Splitter

This Hills Home Hub® Passive Video Splitter Module is used to route the antenna signal, Satellite TV or Cable TV to multiple locations. The Hills Home Hub® HVS-306AIR Active Splitter Video Amplifier Module may be required when the RF signal must travel over longer cable distances. To install the module, simply insert tabs to the cap located on the rail of the enclosure. Press the fastener to lock the module at the desired position. (see Fig. 1)

## Operation

Use only RG-6Q Quad shield Coax cable. A video source is connected to the "IN" port located in the center of the splitter. OUTPUT ports can route the input RF signal to up to four locations.

It is recommend that unused output ports should be capped with 75ohm terminator. (see Fig. 2)

Fig 1

Fig 2

## Installing the 6 Location Active Splitter and the Single Channel Video Modulator

To install the modules, simply insert tabs to the cap coated on the rail of the enclosure. Press the fastener to lock the module at the desired position. Refer to Fig 1.

Refer to Fig 2 for wiring diagram.

Fig 1

Fig 2

## 6 Location Active RF Splitter With IR

### Features

- 3 F-type connector inputs (with one DC power-pass) & 6 F-type connector active outputs
- F-type inputs are capable of accepting signals from Free-to-Air, CATV modulators and security cameras
- Infrared remote control return path
- Digital TV compatible

### Specifications

Dimensions: 75mmH x 150mmW x 161mmD  
Input Frequency Range: 40MHz - 860MHz  
Gain: 12dB FTA input port  
9dB CATV and auxiliary port  
Input / Output Impedance: 75W  
Return Loss: > 15dB typ.  
Port to Port Isolation: > 15dB  
Maximum Output Level: 100dBuV(DIN 45004, IM52dB; each port)  
Power: 12V DC @ 500mA

### Ordering Information

S3437 Active Splitter - 3 IN x 6 OUT with IR

## Single Channel Video Modulator

### Features

- PAL TV modulation
- Ideal for use with VCR's, DVD players and security cameras
- Connector for TV signal
- RCA connectors for audio and video signals
- Mono audio modulation

### Specifications

Dimensions: 76mmH x 165mmW x 59mmD  
Input Frequency Range: 470MHz - 825MHz  
RF Output Level:  $\geq 68$ dBuV  
Audio Modulation: Mono  
Power: 12V DC @ 500mA

### Ordering Information

S2708 HVM-101M Single Channel Video Modulator

# Installing the 6 Location Active RF Splitter With IR

# 4 Channel Video Modulator

## Features

- PAL TV modulation
- Ideal for use with VCR's, DVD players and security cameras
- Up to 8 IR emitters
- F type connector output for TV signal
- 4 sets of 3 x RCA connectors for audio and video signals
- Mono audio modulation
- Plug pack supplied

## Specifications

Dimensions: 49mmH x 268mmW x 75mmD  
Input Frequency Range: 520MHz - 820MHz (CH27 - CH69),  
Each channel independently programmable  
Output Level: 75dBuV  
Input / Output Impedance: 75W  
Return Loss: > 12dB typ.  
Power: 12V DC @ 500mA

## 2 Input 4 Output Multiswitch & Mounting Plate

### Features

- Digital & analogue compatible
- Earth attachment point
- Foxtel approval F10279
- F type connector output for TV signal

### Specifications

Inputs: Horizontal / Vertical

Subscriber Connections: 7286- 4 Ports  
7285- 8 ports

IF Frequency Range: 950-2050 MHz

Through Los @ 950 MHz: 0 dB ± 2 dB

Through Los @ 2050 MHz: +5 dB ± 2 dB

Max IF Input Level: 96 dBμV@950 MHz / 91 dBμV@2050 MHz

Max IF Output Level - IMA3 (DIN EN 50083-3): 98dBμV

Return Loss Inputs: >10 dB

Return Loss Outputs: >10 dB

Isolation Between H/V: >25 dB

Isolation Port to Port: >25 dB

Supply Voltage: Via STU

Max. Current from receiver: 50 mA + LNB

Max. Current consumption: 50 mA

Max. Current to LNB: 500 mA

Control (Selection LNB Polarity): 14 - 16 V

Temperature Range: -20.....+60 °C

Protection index: IP 20

## 5. Infrared Modules

The Infrared control system is designed for family members to remotely control any electronic device such as Audio Receiver, DVD, VCR, Satellite etc via an IR network. With the built-in Cat5/Cat5e cable, users can easily install the IR Emitter, IR Receiver and IR Distribution Module as a complete whole IR control system.

The IR Receiver receives IR signals from handheld remote controls and delivers these to the IR Emitter via the IR Distribution Module. Its special connector allows for easy insertion of IR distribution cable. The IR Module supports four/eight IR applications, and users can add another IR Module using the IR expansion port if required.

# IR Distribution Module

## Features

- Enables the remote control of electronic equipment such as DVD's, VCR's, Pay TV Set Top Boxes and AV Receivers via an IR network
- Receives IR signals from up to 8 remote IR receiver locations then distributes those signals to 8 IR emitter locations for equipment control
- Distributed via Cat5e cables to specified wall outlet locations

## Specifications

Dimensions: 76mmH x 165mmW x 22mmD  
Power: 12V DC @ 250mA  
Max No. of Controlled Devices: 16 (with dual emitters)  
Max. Input Locations: 8  
Connector Type: Press fit terminal block  
Expansion Port: Yes

## Ordering info

S2124 HIR-808 8 Zone IR Module

# IR Emitter

## Features

- Receives IR signals from the IR distribution module and sends them to the electronic device
- Adhesive tape included for attachment to IR sensor window of controlled device
- Supplied with 3.5mm plug to fit into Hills S2689 C type or S2688 H type 3.5mm + IDC Mech
- Dual port emitter wired in parallel

## Specifications

Length of Wire: 3m

## Ordering info

S3416 HEM-1 IR Emitter - Single Output  
S3417 HEM-2 IR Emitter - Dual Output

# Installing the IR Distribution Module

To install the modules, simply insert tabs to the cap coated on the rail of the enclosure. Press the fastener to lock the module at the desired position. Refer to Fig 1.

## Operation

There are two rows of terminal blocks on this module. The top row has the IR Receiver blocks labelled "From Rooms" they are used to connect IR Receivers. The bottom row features the IR Emitter blocks labelled "To Rooms", they are used to connect IR Emitters. (see Fig. 2)

## Connecting the IR Receiver

Each set of IR Receiver block has three terminals which are labelled "S", "-" and "+". Strip wire (CAT5/CAT5e Solid Cable) ends 4mm and insert into this terminal block according to the following wire instruction for IR Receiver connection: "S" = White Orange, "+" = White Brown, "-" = Brown.

Note - It is advisable to maintain identical cable colour coding for "S", "-" and "+" for all IR Receiver blocks.

## Connect the IR Emitter

Each set of IR Emitter block has two terminals which are "-" and "+". Strip wire cable (CAT5/CAT5e Solid Cable) ends 4mm and insert into this terminal block according to the following wire instruction for IR Emitter connection: "+" = White Green, "-" = Green.

Note - It is advisable to maintain identical cable colour coding for "+" and "-" between IR Emitter Adapter and IR Emitter block.

Apply a 12VDC power adapter to this IR Distribution Module and your IR system is ready to go. A power

cord is included for connections to the (HPS-25W18AC or HPS-60W) Hills Home Hub® power supplies. Simply connect both ends to the proper DC sockets.

## Sensitivity Adjustment

There is a gain/sensitivity adjustment used for tuning the amplified level. To adjust for different cable losses you can use sensitivity adjust to increase the gain and get appropriate signal levels.

## IR Receiver (HRM-1) & IR Emitter (HEM-1)

The IR Receiver (HRM-1) receives IR signals from a handheld remote control and transmits to all IR emitter (HEM-1) to control corresponding electronic devices. The transmission media is CAT 5 or CAT 5e cable. Point the handheld remote control to the IR Receiver so that the IR receiver has a straight view to receive the signal. The distance between the IR Receiver and the remote control should not exceed 5 metres.

Note - it is recommended you install ONLY ONE IR Receiver per room.

## IR Expansion Method

The Expansion Output port is used to control additional audio or video devices or to allow more rooms to control audio or video devices when applications go beyond eight. Simply connect the terminals "S" and "-" from the Expansion Output of the first HIR-808 IR Distribution Module into anyone of the IR Receiver block terminal of the additional HIR-808 IR Distribution Module.

Fig 1

Fig 2

## Wired IR Target

### Features

- Receives Infrared signals from the device remote control and sends them to the HIR-808 IR Distribution Module

### Specifications

Power: 12V DC from HIR-808 Module  
Length of wire: 1.5m

### Ordering info

S3418 Wired IR Target

## Remote Room IR Target - RF

### Features

- Receives Infrared signal from the device remote control and sends them to the S3437 Hills Active Distribution Splitter. The signal is repeated by the HI2014 four channel modulator which is placed in the location of the device that is to be remotely controlled.

### Specifications

Power: 5V DC from S3437 Hills Active Distribution Splitter  
Length of wire: Supplied separately

### Ordering info

HI3041 Remote Room IR Target - RF

## 6. Power Supplies

The Hills range of modular power supplies delivers distributed power to all active Hills Home Hub modules, as well as security and music distribution systems.

Delivering a space saving advantage compared to traditional plug packs and transformers makes the modular power supply the logical choice for all your power distribution needs.

# Power Supply Modules

## Features

- Provide full-regulated, high quality and low EMC DC power for any active modules inside the Hills Home Hub enclosure
- Normally placed at the bottom of the enclosure

## Specifications

HPS-60W contains:

- 3 x (2.5mm) power ports @ 12V DC
- 1 x (2.1mm) power port @ 5V or 7.5V switch able via slide switch
- 1 x (4-pin 5.08mm socket) power port @ 12V DC used to power the HUS-104 & HUS-108 Music Distribution modules

**Total Power Output:**

60Watts or 5 Amps @ 12V DC Resettable output fuse. (NB. Remove all output load for 5 mins to allow fuse to reset)

HPS-25W contains:

- 3 x (2.5mm) power ports @ 12V DC
- 1 x (2.1mm) power port @ 5V or 7.5V switch able via slide switch
- 1 x (4-pin 5.08mm socket) power port @ 18V AC used to power the Hills Home Security System controller.

**Total DC Power Output:**

25Watts or 2 Amps @ 12V DC

**Total AC Power Output:**

18V AC @ 1.5 Amps

Separate resettable output fuses for DC and AC outputs.

(NB. Remove all output load for 5 mins to allow fuse to reset)

HPS-60W Power Supply

HPS-25W Power Supply

## Ordering Information

S2121 HPS-60W Power Supply 60 Watts 12V DC

S2267 HPS-25W18VAC Power Supply 25 Watts 18V AC

# Installing the HPS-60W and the HPS-25W Power Supply Modules

To install the module, simply insert the tabs to the cap located on the rail of the enclosure. Press the fastener to lock the module to the desired position. (see Fig.1)

## Wire installation:

Mains power connection is via the supplied 3 pin IEC cord. Plug the cord into the IEC plug at the bottom of the power module, and the 3 pin mains plug into a GPO. The power module has an isolation switch adjacent to the IEC plug, switch it off if you are required to remove mains power from the power module. Follow the diagram in fig.2 for all output connections.

Fig 1

Fig 2

## 7. Music Modules

The Hills Music Distribution system delivers whole home audio from a single source to 4 or 8 room locations. As the amplification is done at the volume control, it permits true volume control at each location.

# Single Audio Sources Distribution Modules

## Features

- Provides a single audio source to up to 8 locations
- Utilising the HVC-40W volume control plate, each location has independent volume control

## Specifications

Dimensions: 104mmH x 165mmW x 54mmD

Max. Wattage: 4 Zone: 20 Watts  
8 Zone: 40 Watts

Speaker Impedance: 8ohm

Audio Source: Single

Max. Locations: 4 / 8

Power Input: 12V DC

Connector Type: Press fit terminal block

## Ordering Info

HMS-104 Single Source

HMS-108 Single Source

# Installing the Audio Sources Distribution Module

To install the module, simply insert the tabs to the cap located on the rail of the enclosure. Press the fastener to lock the module at the desired position. (see Fig. 1)

## Operation / Wire

Using Cat5/5e cable, connect the music source (such as a receiver or CD player audio out via a wall inlet) to the Music Distribution Module terminals L-G-R labeled "FROM SOURCE". Where "R" = Right channel, "L" = Left channel, and "G" = Ground.

**Note: Use 1 twisted pair of a Cat5/5e cable for the Left and Right channels. (see Fig. 2)**

Using 14 gauge speaker cable, connect the "IN-R / COM" and "IN-L / COM" from the volume control to the music module terminals L-G-R labeled "TO VOLUME PLATES". Simply strip off wires and insert into the appropriate terminal blocks.

Note- The speaker cable connected to the music module must be connected to the left hand side of the volume control.

Using 14 gauge speaker cable, connect the "OUT-R / COM" and "OUT-L / COM" from the volume control to the room "8 ohm speakers". Simply strip off wires and insert into the appropriate terminal blocks.

**Note: The speaker cable connected to the "8 ohm speaker" must be connected to the right hand side of the volume control. Connect the power cable to the DC power module (not included).**

The DC power module contains a 12VDC, 4-pin 5.08mm socket for over 3A current devices and is designed specifically for this music distribution system. Please refer to the figure for wiring.

## Gain/Sensitivity Adjustment

There is a gain/sensitivity adjustment used for tuning the power amplified level. Different audio has different output level, if your audio is a low level output, then you can use gain/sensitivity adjust to increase the gain and get appropriate volume.

Leads

Digital Audio/Composite/ Subwoofer/ Centre

**RCA**

RCA Connectors are the most flexible and common form of hooking up two components in a home entertainment system.

**Single RCA**

Used for Digital Audio, Composite Video, Subwoofer and Centre Channel signals, Digital Audio allows multiple channels to be transmitted through a single cable. Most critical listeners prefer a single RCA Digital coaxial cable to a Fibre Optic cable because of its ability to sound more natural. Composite Video, Subwoofer and Centre channel are conventional analogue signals and are transmitted through their own dedicated cable.

**2 RCA**

Used almost always for the transmission of Stereo Audio signals Colour coded Red for the Right Audio channel and White for the Left Audio channel. It is the most common type of cable and is supplied free with equipment by Hi Fi manufactures. It is important to bear in mind that free interconnects do not allow the equipment they are supplied with to reach it's performance potential.

**3 RCA**

Used primarily in Home Theatre applications for the transmission of the Left Audio channel, Right Audio channel and Video picture signal. It is also used increasingly for the transmission of Component or RGB Video, so called because the Video picture signal is separately transmitted in its three component colours of red, green and blue. This format is included in many new equipment formats such as DVD, Satellite and Plasma Projection Colour TVs. The format delivers increased colour resolution with more detail and realism than is possible with conventional S-Video or Composite Video connections. It will also likely become the standard with Hight Definition Television "HDTV".

**6 RCA**

A highly versatile configuration originally pioneered by SMT. It is most commonly used for Dolby Digital solutions, consisting of 6 seperate channels of audio-Left Front, Centre, Right Front, Right Rear, Left Rear, and Subwoofer. The extensive versatility of this configuration means that is has a wide variety of Home Theatre applications for both audio and video.

**H65RW 6" In Wall/Ceiling Speaker - Pair**

Dimensions 30.5cm H x 21.9cm H  
 Cutout Dimensions 27.3cm H x 18.57cm W  
 Mounting Depth 6.2cm  
 Shipping Weight 4.32kg (pair)  
 Frequency Responses 50Hz~20 kHz  
 Impedance Compatible w/8ohm Output  
 Efficiency (dB 1w/1m) 89dB  
 Recommended Amp 20-100 watts/channel  
 Driver Complement  
 Mid-Bass 16.5cm Kevlar Cone  
 Tweeter 1.9cm Dome in Swivel Mount  
 Colour/Finish Matte/White (Paintable)  
 Aimable Tweeter Yes

S2751

**H65RW 6" In Wall/Ceiling Speaker - Single**

Dimensions 30.5cm H x 21.9cm H  
 Cutout Dimensions 27.3cm H x 18.57cm W  
 Mounting Depth 6.2cm  
 Shipping Weight 2.15kg (each)  
 Frequency Responses 32Hz-20kHz  
 Impedance Compatible w/8ohm Output  
 Efficiency (dB 1w/1m) 89dB  
 Recommended Amp 20-100 watts/channel  
 Driver Complement  
 Mid-Bass 16.5cm Kevlar Cone  
 Tweeter 1.9cm Dome in Swivel Mount  
 Colour/Finish Matte/White (Paintable)  
 Aimable Tweeter Yes

S2331

**H8RW 8" In Wall/Ceiling Speaker**

Dimensions 35.6cm H x 25.4cm H  
 Cutout Dimensions 32.38cm H x 22.07cm W  
 Mounting Depth 6.2cm  
 Shipping Weight 2.7kg (pair)  
 Frequency Responses 55Hz ~ 20kHz ± 4kHz  
 Impedance Compatible w/8ohm Amp  
 Efficiency (dB 1w/1m) 90dB  
 Nominal power 60 watts  
 Max power 120 watts  
 Driver Complement  
 Mid-Bass 20.3cm Kevlar Cone  
 Tweeter 2.5cm Dome in Swivel Mount  
 Colour/Finish Matte/White (Paintable)  
 Aimable Tweeter Yes

S2747

**H6RC 5" Rectangle Centre Speaker**

Dimensions 44.9cm H x 22.1cm H x 7.7cm  
 Cutout Dimensions 41.4cm L x 18.6cm W x 66cm D  
 Mounting Depth 8.25cm  
 Shipping Weight 2.55kg  
 Frequency Responses 60Hz ~ 20kHz ± 4 KHz  
 Efficiency (dB 1w/1m) 87dB ± 2 Db  
 Nominal Power 80 watts  
 Max Power 160 watts  
 Driver Complement  
 Bass 16.51cm Dynamic Balance  
 Mid Bass 16.51cm Dynamic Balance  
 Kevlar Cone  
 Tweeter 2.5cm Dynamic Balance  
 Ring Radiator  
 Colour/Finish Matte/White (Paintable)  
 Aimable Tweeter Yes

## Music Accessories - Speakers cont

S2333

**H8CC8" In Wall/Ceiling Round Speaker**

Dimensions	27.3cm Diameter
Cutout Dimensions	23.8cm
Mounting Depth	9.6cm
Shipping Weight	3.8kg (pair)
Frequency Responses	50Hz ~ 20kHz ± 4kHz
Impedence	Compatible w/8ohm Output
Efficiency (dB 1w/1m)	90dB
Nominal Power	100 watts
Max Power	200 watts
Driver Complement	
Mid-Bass	20cm Mineral Filled Kevlar Cone
Tweeter	2.5cm Dome in Swivel Mount
Colour/Finish	Matte/White (Paintable)
Aimable Tweeter	Yes

S2505

**H50DW 5" Outdoor Speaker**

Dimensions	24cm H x 18.5cm W x 16.5cm
Shipping Weight	6.3 kg (pair)
Frequency Responses	65Hz-20kHz
Impedence	Compatible w/8ohm Output
Efficiency (dB 1w/1m)	89 dB
Recommended Amp	20 - 60 watts/channel
Driver Complement	
Mid-Bass	13.34cm Polypropylene Cone Rubber Suspension
Tweeter	2.5 cm Titanium Hard Dome
Colour/Finish	Matte/White (Paintable)

S2334

**H10SW 10" Subwoofer Speaker**

Dimensions	36.51cm H x 35.56cm W x 40.96cm
Shipping Weight	7.7kg (each)
Frequency Responses	35Hz-200Hz/40Hz-160Hz
Sub Amp Dynamic Power	100 watts
Crossover frequency	Adjustable 80Hz-200Hz
Drive Unit Complement	
Bass	25.4cm Woofer
Port	Front Panel Flared Port
Inputs	Speaker, Line Level
Outputs	Speaker Level
Colour/Finish	Matte Black
