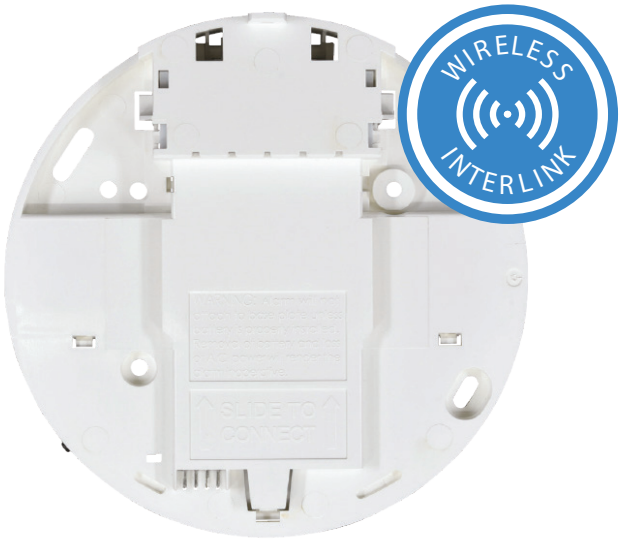
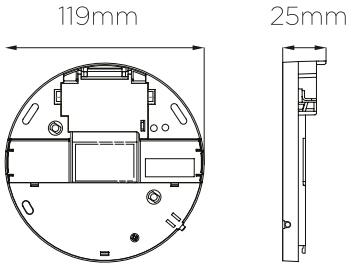
6000WB WIRELESS BASEPLATE

RF Interlink Baseplate for LIFESAVER 6000 Series Smoke Alarms





Tested & Complies to Australian Standards AS3786:2014

Application

The PSA LIFESAVER 6000WB is an auxiliary product to the 6000 and 6000RL smoke alarms. It is a smoke alarm baseplate with an in-built RF interlink module.

When a LIFESAVER 6000-series mains powered smoke alarm is installed onto it, it can wirelessly interlink with other 6000-series smoke alarms also mounted onto 6000WB bases. As a result, when the smoke alarm sounds, the 6000WB will cause other smoke alarms in the same RF interlinked network to also go into alarm. The 6000WB, when paired with the 6000THL wireless smoke alarm controller, can remotely test and hush 6000 and 6000RL model smoke alarms.

The PSA LIFESAVER 6000WB RF interlink protocol is wirelessly compatible with the PSA LIFESAVER 6000DCW wireless 10-year lithium battery (non-replaceable) smoke alarm.

Features

- The 6000WB wireless base is designed to be connected to LIFESAVER 6000 and 6000RL smoke alarms.
