PIXIE - SMARTER THAN THE REST

PIXIE digital switches, multifunction controls and dimming devices comply with AS/NZS 60669.2.1 and are designed to fit most common branded single, double or triple switch plates and are provided with a set of complimentary shaped key caps.

All PIXIE devices are designed with an unobtrusive LED function indicator and all electrical devices are designed with a two wire termination mech, with no messy loop wiring required.

PIXIE electrical devices are designed with overload, over-heating and full short circuit protection and function as a standard digital mech with secure (manual) functionality in the event of any wireless communication disruption and for ease of installation, PIXIE mechs are designed with retention screws.

PIXIE Bluetooth wireless communication range is 15 metres between any device and PIXIE dimmers are designed for trailing edge phase cutting dimming technology.

PIXIE PLUS is fully compatible with all PIXIE controls and operates from anywhere in the world with internet connectivity and functions with popular voice control devices.

CONTROL YOUR HOME LIGHTING WITH **PIXIE PLUS** FROM ANYWHERE IN THE WORLD

PIXIE - WHICH PRODUCT DO I NEED?

The choice is easy, PIXIE products consist of a **MASTER** device which are designed to operate as a stand alone electrical device AND **SECONDARY** devices which are designed to operate with a paired **MASTER** PIXIE device

MASTER PIXIE DEVICES

These devices are designed to operate as stand alone electrical devices

PIXIE Switch SWL350BT GEN 2 - suitable for a maximum 350 watt lighting load, (minimum 13 watt) and designed with a simple two wire termination mech and shaped to suit most common branded single, double or triple switch plates with a simple push on/off function, with of course Bluetooth control.

PIXIE Dimmer SDD350BT GEN 2 - suitable for a maximum 350 watt trailing edge dimmable lighting load, (minimum 2 watt) and designed with a simple two wire termination mech and shaped to suit most common branded single, double or triple switch plates with a simple push on/off function, hold to dim up or down, memory functionality and of course with Bluetooth control.

PIXIE LED Strip (RGB) FLP12V/RGBBT, (WHITE) FLP12V/SBT FLEXI SMART - Looking to create an exciting feature? PIXIE Bluetooth RGB or PIXIE WHITE LED strips are the ideal choice. With plug and play connectivity 2 or 5 metre lengths with Bluetooth control, the IP44 range of LED strips are suitable for a wide range of applications.

SECONDARY PIXIE DEVICES

These devices are designed to operate with a paired PIXIE master device

PIXIE Multifunction Control SMF/BT - for those difficult jobs where sourcing a switch wire in a wall cavity is challenging, the PIXIE multifunction control simply requires an active and neutral from any identifiable location in the installation to enable it to be paired to a PIXIE LED strip, switch or dimmer with full multifunction control, such as two-way, three-way or four-way functionality, with of course Bluetooth control.

PIXIE Multiway Switch S2W/BT - commonly known as a two way or three way switch mech, the PIXIE Multiway switch is designed to operate with PIXIE switch and PIXIE dimmer and utilizes the existing wiring circuit, designed with a simple two wire termination mech and shaped to suit most common branded single, double or triple switch plates with a simple push on/off function, with of course Bluetooth control.

PIXIE Multifunction REMOTE Control SMC/BT - let's make life easy! The PIXIE remote battery control allows the user to communicate and control with any paired PIXIE device, without the need for additional wiring. Great for medical care environments, bedrooms or lounge rooms or for those difficult jobs where sourcing an additional switch wire in a wall cavity is challenging.

PIXIE Signal Booster - SGB/BT, USB port Bluetooth signal booster for inferior wireless environments.

SECONDARY PIXIE DEVICES

These devices are designed to operate with a paired PIXIE master device

PIXIE Timer Control - STC/BT, A versatile timer control with selections ranging from 1 minute to 24 hour intervals, controlling any PIXIE device.

PIXIE app - (SAL PIXIE) PIXIE Bluetooth communication is supported by a free iOS or Android APP.(SAL PIXIE), it controls switching, dimming, set a scene, set a timer or schedule, which is great for security, group PIXIE devices, smart location memory functionality, control any space within your home and office.

PIXIE PLUS app - In conjunction with the PIXIE PLUS gateway control your PIXIE HOME from anywhere in the world. PIXIE PLUS is compatible with popular voice control devices. SAL PIXIE PLUS is supported by a FREE iOS and Android app.
