MAX9 PRO

Clipsal's latest innovation, the **MAX9 PRO**, is a chassis-style metal distribution board that sets new standards in installation speed, professionalism, flexibility, and performance.

MAX9 PRO is designed to meet the electrical distribution requirement of light commercial and large residential installations. Available in 24, 36, 48, 60, and 72 pole chassis board with 160 A and 250 A switch options and compatible with the **MAX9** 6kA circuit protection devices.

MAX9 PRO - Addressing the Needs of a Wide Range of Applications

Light Commercial

Small Office Buildings

Small buildings need **versatile** and **compact** distribution boards to suit limited office spaces. It should also be able to handle various electrical loads and integrate **surge protection devices** to safeguard office equipment and systems.

Small Warehouses

Small warehouses require distribution boards with **robust design** to withstand industrial environments whilst having **generous wiring space** and being modular for **easy upgrades and maintenance**. It should be able to accommodate various electrical loads such as general power, lighting, small industrial machines, motors and controls.

Cafes and Restaurants

Cafes need **efficient power distribution** for kitchen equipment, lighting, and customer areas. The distribution boards should fit within **limited spaces** while providing load control and **energy monitoring solutions** to reduce operating costs.

Retail Stores

Retail stores require distribution boards that provide minimum downtime for lighting, security, and point-of-sale systems. It should enable **integration of energy metering** to monitor and reduce energy consumption. The design ergonomics should be user-friendly for quick and **efficient operation and maintenance**.

Medical and Dental Care Facilities

Medical care facilities require highly reliable and safe power distribution systems to **protect critical medical equipment**. It should enable integration of backup power sources whilst providing **10 mA residual current protection** for patient areas.

Aged Care Facilities

Aged care facilities need distribution boards that require **additional capabilities** in circuit protection. It should enable simple **integration of AFDDs** and **emergency lighting test kits** for buildings with more vulnerable residents.

Residential

Large Homes

For large homes, the distribution boards should be capable of handling more than **100 A** to support current and **future energy** intensive appliances including HVAC systems, water heating, cooking, and **electric vehicle charging**.

Apartments

Common areas in apartment buildings, such as lobbies, hallways, and recreational spaces, require stable power distribution feasible with integration of **energy metering** solutions to help **comply with building codes**.

MAX9 PRO - Discover MAX Features

Schedule holder

To secure the circuit schedule

Switch and MCB incomer options

Bringing flexibility to the application

Modern design with rounded corners

Seamlessly blending into its environment

Metal door handle

For a robust performance

Clear labelling

Enhancing the professionalism for installer

Knockout and pole fillers

Enhancing the professionalism for installer

Modular or stackable extension box

For easy DIN device installation up to 36 modules

Tap off points for SPD protection
For ease of installation

Unswitched neutral incomer
Make neutral connection easier

Large incomer cable space
Easier to connect larger mains cables

Provision to mount DIN devices
Supports variety of applications

Fully shrouded design
Additional protection by isolating from active conductors

Plenty of wiring space
Easy installation and routing of outgoing cables

Phase neutral chassis
Faster installations with MAX9 RCBO without the need for line side neutral cabling

Torque labels
Clear guidance for installation and maintenance

Comb busbar Kit
For higher rating MCB's (50 A, 63 A)

Cable tie points
Neat and professional wiring

MAX9 PRO - Embrace MAX Benefits

MAX Professionalism

Contemporary design inspired by modern aesthetics with innovative phase and neutral distribution chassis.

An angled neutral and earth bar provides better access to wiring. The split neutral and earth bar enables neater wiring.

MAX Speed

MAX9 PRO
Distribution board

Traditional
Distribution board

4x Faster
Installation

MAX9 PRO offers installation speed up to **four times** faster than traditional chassis distribution boards, thanks to the phase and neutral distributed chassis, eliminating the need for neutral wiring on RCBOs.

MAX Space

2x More Space

MAX9 RCBOs with **no neutral flying leads** offers more wiring space inside the board.

The optimised position of **incomer switch** and **DIN rails** maximizes space utilisation within the board, providing **2 times** more DIN space for device installations.

MAX Flexibility

A reversible door assembly allows for flexible installation, accommodating different room layouts and user preferences.

A modular extension box offers customizable system expansion to meet application needs.

A distribution board with dual key holes and vertically aligned labels allows top and bottom feed installations.

MAX Ease

Stocking is now made easy with just one range of MAX9 devices compatible across both Light commercial and residential applications.

Easy to remove and install cover with U-shape cut out for screw fixings.

Locking device

Catalogue No.	Description
4LD	Locking device for MAX9 circuit breakers, isolating switches and RCDs (lockable in ON and OFF position). Suits padlocks with shafts up to 6mm.
A9A26970	Locking device for MAX9 devices except RCBO SLIM, lockable in ON or OFF position, with padlock diameter up to 6mm.
26970	Locking device for MAX9 RCBO SLIM, lockable in ON or OFF position, with padlock diameter up to 8mm.

*Locking in ON position does not prevent tripping of the breaker in the event of faults

Quick Selection Guide for Distribution Boards

Light Commercial and Large Residential

MAX9 PRO Distribution Boards

MAX9 PRO: Light duty distribution board for light commercial and large residential installations.

MAX9 Circuit Protection

MAX9 RCBOs with 6kA breaking capacity, easy to install with MAX9 PRO Chassis and MAXBAR DIN comb busbar systems.

Available through:
- Wholesaler (as stock item)

Medium and Large Commercial
+ Industrial Applications

Acti9 MB MD Distribution Boards

Acti9 MB MD: Heavy duty distribution board for commercial and industrial applications, for indoor or outdoor use.

Acti9 Circuit Protection

Acti9 RCBOs with up to 10kA breaking capacity, easy to install with Acti9 distribution board and chassis systems. Additionally, Acti9 systems deliver selectivity, cascading and co-ordination with upstream MCBs or MCCBs.

Available through:
- Wholesaler
- Panel builder
- Schneider Custom DBs
- Schneider Flex-Select Tool

Environmental Data Program

Next-level transparency for better-informed product choices

The Environmental Data Program is a framework for how we measure, categorize, and compare the environmental attributes and footprint of our products.

Using a rigorous, fact-based methodology, the program provides environmental data from across the product lifecycle.

Five data categories across the product lifecycle

Use Better: How sustainable a product is, including environmental footprint, materials and substances, packaging, and energy efficiency.

Use Longer: How a product's life time can be effectively extended in terms of reparability and updatability.

Use Again: How a product can be reused, from dismantling and remanufacturing to recyclability and manufacturer take back.

With this transparent, verified data, customers and partners are empowered to make conscious environmental choices and accurately evaluate and report on sustainability performance.

All our hardware offers have an associated environmental data available on se.com product pages.

Learn more about the
Environmental Data Program
